

## **Profili Partners Progetto NADIA**

**Noise Abatement Demonstrative and Innovative Actions  
and information to the public**

Life 09 ENV IT 000102

### **Town of Prato ([www.comune.prato.it](http://www.comune.prato.it))**

The Town of Prato made the acoustic zoning and the report of noise according to national and regional laws. The Municipality have 187.405 inhabitants. According to D.lgs. 194/05 within 30/06/2012 the town of Prato must produce noise map and within 18/07/2013 the noise plan. On the other side Prato is not identified as conurbations for which the preparation of maps is mandatory. However Prato deem important to address the noise problem anticipating this formality.

In Prato the project deals with a large area located in the Centre of its territory (about 40% of the city) where different noise sources and targets are represented. This area is very significant but the Municipality still intends to complete the work throughout the city, even if project resources are not calculated for this.
